MUKESH KARTHICK

Growth Marketer | Paid Media | Tracking & Analytics

mukeshjkarthik@gmail.com | +44 7554 649960 | LinkedIn | Portfolio | Willing to relocate

PROFILE

Growth Marketer managing paid social across Meta and TikTok for a 16-venue UK hospitality group, overseeing £14K to £16K in monthly ad spend. Experienced in structured creative testing, full-funnel campaign planning and conversion tracking, using performance data to decide which campaigns and creatives to scale and which to retire. Backed by an MSc in Business Analytics from the University of Bristol, with a data-first approach to budget and creative decisions. Curious and eager to learn, and keen to bring a test-and-learn approach to scaling paid social and customer acquisition.

EXPERIENCE

Marketing Executive
Mar 2026 – Present

Breaking Brands

- Manage Meta and TikTok paid social for **16 UK venues**, overseeing **£14K to £16K** in monthly ad spend across always-on and event-led campaigns, contributing to a **3.2% year-on-year revenue uplift**.
- Run structured creative tests across static, video and UGC formats, evaluating hook rate, CTR and cost per purchase to identify winning creative and retire underperforming ads early.
- Scale high-performing campaigns through incremental budget increases and roll-outs to additional venues, using CBO structures to direct spend towards the strongest-performing locations.
- Plan full-funnel campaigns that build warm audiences through traffic campaigns, retarget engaged users and convert them through video sales campaigns, for both seasonal launches and always-on activity.
- Identified that a third-party booking iframe was blocking purchase events, and rebuilt conversion tracking using a custom confirmation page, Meta Pixel and server-side Conversions API, improving ROAS by **2.43x**.
- Audited and consolidated **41 Meta Pixels** into one per venue, and implemented GA4, GTM ecommerce tracking and a UTM framework across all venues, documented in a tracking SOP.
- Developed a custom booking journey on Wix Velo integrated with the Tonic API, enabling **five-click bookings** with upsells, which increased bookings and reduced customer complaints.
- Manage a **98-page** multi-venue website and build campaign-specific landing pages to improve conversion from paid traffic.
- Built a weekly KPI reporting system combining Meta Ads, bookings and ticketing data, alongside Looker Studio dashboards and a venue league table presented to senior stakeholders.
- Built AI-powered automations using n8n and Claude across reporting and customer queries, saving **around 25 hours per month**.

IBM Industry Collaboration Project
Jan 2025 – Mar 2025

University of Bristol

- Analysed **50,000+** social media records using Python and SQL to identify which content and audiences drove engagement and performance.
- Built Power BI dashboards and presented data-led recommendations to IBM stakeholders.

Founding Marketer
Sep 2023 – Sep 2024

FocuzAR Solutions

- As the first marketing hire, helped grow a B2B AI product from zero to **$40K** in revenue within **six months**.
- Planned and ran LinkedIn ad campaigns for recruitment and founder outreach, and grew the founder's LinkedIn audience to **10,000** followers.
- Generated **60+** leads from a **2,000+** attendee industry event, converting them into **35** product demos and **7** closed clients through structured qualification and follow-up.
- Produced sales collateral, including pitch decks, one-pagers, demo videos and webinars, used throughout the sales process.

Marketing and Research Analyst
Dec 2022 – Mar 2023

Xwall

- As the sole marketing and research analyst, conducted competitor and customer research in collaboration with the CTO and product team.
- Built Power BI dashboards that reduced reporting time by **around 40%**, and produced product content for launch materials.

Freelance Content and Paid Ads Marketer
2021 – 2022

Growthalyst

- Delivered content and paid advertising for SME clients, with a focus on health and wellness brands.
- Built **8** WordPress websites for small businesses, growing revenue to **₹80K**.

EDUCATION

MSc Business Analytics (Merit)
2024 – 2025

University of Bristol

- **Dissertation:** analysed customer satisfaction data across the **top 10** airlines, comparing premium and low-cost carriers, using gradient boosting and other machine learning models in Python to identify the factors that most influence satisfaction and buying decisions.
- Applied sentiment analysis and statistical methods to customer reviews, turning model outputs into practical recommendations on service and positioning.
- Sourced data through APIs, building the technical foundation now used to pull Meta Ads data into automated performance reporting.
- **Marketing analytics project:** analysed consumer datasets to uncover purchase behaviour and inform data-led marketing recommendations.

BSc Business, Marketing and Finance
2020 – 2023

University of Madras

- Elected College President, leading student initiatives including employer outreach that brought companies to campus for placements.
- Planned and delivered a two-day digital marketing workshop for **750+** students.
